SUMMARY

Sharon is experiencing academic stress and uncertainty about her major's long-term viability due to course selection and writing abilities.

KEY CONCERNS

- Repeating courses with strong faculty, leading to major status
- Advanced placement of chemistry courses, lack of understanding of concepts
- Poor time management and writing skills, risk of falling behind
- Uncertainty about whether to stay in chemistry or pursue a different major

ACTION PLAN

- Refer Sharon to writing workshops and peer tutoring services
- Suggest attending writing center to improve grammar and organization
- Discuss potential alternatives, such as engineering or biology with lower math requirements
- Encourage shifting coursework to expose herself to more challenging chemistry options

FOLLOW UP PLAN

- Schedule a review session in January if academic plan is in flux
- Evaluate course selection for the next semester and request updates
- Encourage sharper goals for next steps after graduation
