SUMMARY

Rebecca is struggling with the academic demands of a computer science major, including course load, grades, and research integration.

KEY CONCERNS

• Losing grades in advanced CS courses
• Feeling behind despite working hard
• Concerns about integrating a major into a technical field
• Worries about academic performance and career prospects

ACTION PLAN

• Recommend scheduling adjustment to reduce course load and focus on easier courses
• Encourage Rebecca to attend writing and time management workshops in the Writing Center
• Discuss the research project as a separate academic unit, rather than a major component
• Recommend attending career workshops and connecting with alumni in the tech industry

FOLLOW UP PLAN

• Check in mid-semester to monitor grades and identify any new challenges
• Offer a semester review session if grades improve
• Refer Rebecca to the new major advising office if she's interested in exploring other fields
